COILS™**

**Coils**

If it has to be perfect, it has to be

***SUPER***

# WHO WE ARE

---

Super Radiator Coils is a family owned company and we take pride in our commitment to our core values of Teamwork, Relationships, Integrity, Problem Solving, and Excellence. These principles govern how we operate our business, and we're dedicated to being a partner you can trust.

We strive to manufacture a quality product and help make our customers better at what they do. Because whether it's our coil design, quality control programs, customized delivery cadences, or something else, if it has to be perfect, it has to be Super.

## Segments & Applications

Our products are completely custom-made and designed for the precise needs of your application. We produce heat transfer products for dozens of industries – whether you need coils for a large industrial project, high-volume coils for HVAC units, or something else, we'll work with you to get you what you need. From mom and pop operations to Fortune 10 mainstays, we're here to support you.

### Commercial

Air Handlers  
Boiler Systems  
Chilled Water Systems  
Data Center & Electronics Cooling  
Dehumidification Systems  
District Heating  
Hot Water Systems  
HVAC Economizers  
Thru-the-Wall Air Conditioning Systems  
Transit Cooling Systems  
Waste Heat Recovery

### Industrial

Air Handlers  
Boiler Systems  
Chillers  
CHP  
Data Centers  
Environmental Chambers  
Furnace  
Industrial A/C Systems  
Laser  
Laundry Services  
Process Cooling  
Product Driers  
Product Heating  
Refrigeration Systems  
Waste Heat Recovery

### Institutional

Air Handlers  
Boiler Systems  
Central Heating  
Chilled Water Systems  
Clean Rooms  
Data Centers  
Dehumidification Systems  
Economizers

### Military

Comfort HVAC  
Electronics Cooling  
Ground Support Systems  
HVAC  
LCAC Oil Coolers  
Portable ECUs  
Refrigeration  
Transformer Cooling  
Vehicle Cooling

*“Our mission is to be leaders and best in the heat transfer industry while caring for our workforce, communities & environment.”*

— SRC Mission Statement

# MATERIALS & SPECS

You expect a quality product, and we expect the same from ourselves. We offer thousands of different material and design combination options to make sure we're providing you with the performance, durability, and price point that your application needs.

From corrosion-resistant material options, to shock and vibration considerations and more, we can build coils for a host of heat transfer applications.

# EVAPORATOR COILS

Interlaced circuiting & face / row split for commercial HVAC

Evaporator with heat shrink on distributor leads for heat pump applications

Designed for environmental chambers with ultra low temperatures

5mm A-frame built for military comfort HVAC

Copper/aluminum evaporator with flexane application

Split face design with stainless steel headers

# CONDENSER COILS

---

5mm design for commercial HVAC

Standard condenser for process cooling

CO2 coil for industrial refrigeration

Formed condenser with high fin count for commercial HVAC

Rugged railroad transit HVAC housing with sub-cooling section

Formed condenser with low fin count for refrigerated displays

# FLUID COILS

---

Water coil for data center cooling

Sectional split core for easy installation for commercial HVAC

Fluid coil for industrial process cooling

Water coil with coated fins for military applications

# STEAM & STEAM DISTRIBUTING

---

Standard steam coil

Steam distributing coil with carbon steel header

# HOT GAS REHEAT COILS

---

2 row 5mm hot gas reheat coil

1 row hot gas reheat coil for commercial HVAC application

# GAS COOLERS

---

1 row gas cooler featuring copper alloyed with nickel & tin materials for high pressure application

Corrosion resistant 8-row gas cooler with pre-coated aluminum fins
